TO WHOM IT MAY CONCERN

Miss Kadijatou Kanaji was known to me since the past eight months. During this period, she proved to be very hard working and obedient to her seniors, colleagues, patients and or client.

Above all, her sheer determination is characterised by success and in any minute of life, this is the success that she always aims for. She is also ready to learn at any time. For all the above qualities in her, I recommend her to the authority of any institution for higher learning to further her education in her area of interest.

Your sincerely,
