

**STATEMENT OF PURPOSE FOR ADVANCE DIPLOMA IN NURSING (RN) AT THE GAMBIA COLLEGE, BANJUL.**

Dear admission committee,

I am a young Gambian with a high passion to be a registered nurse because nursing is a career of continuous learning which is very significant to all human lives. Nursing is a profession which focuses on the care of individuals from societal level to the rest of the globe to obtain quality of life. I believe that nursing is very rewarding, high demanding specifically in The Gambia but very challenging due to the approach to patient's care required. I have been a Red Cross and Peer health member throughout my high school and I have seen how it feels to care for a patient. I developed a lot of skills to be a registered nurse.

Academically, I missed English and Mathematics in my final exam due to many factors, but if given the chance to be a registered nurse, I will work on them before completion. Although, I was not a science student but I have a love for science especially Biology.

Personally, I always feel pain whenever I visit the hospital or clinic seeing patients in long queues standing due to inadequate health personnel to attend them. Thus, I deem it necessary to take this opportunity to contribute to the solution of such a problem. Therefore, your support is highly solicited to pursue my vision and be a good individual in national development. I promise to be dedicated towards my determination. Thank you.

Yours sincerely,

Fatoumata Bah.
