To whom it may concern

I am writing to recommend Demba Baldeh for the nursing program at your noble institute. He has been working for mango clinic for about two years as a nursing aid.

He is a dedicated, hardworking and responsible nurse. During his work with the clinic, Demba distinguished himself as an outstanding nurse assistant among the entire staff. He constantly provides safe and compassionate care to our clients and their families. He was initially attached at our outpatients department where he eagerly learned many nursing skills including vital signs taking and their proper recording, setting of iv cannulas, dressing of patients, triaging of patients etc.

He has aided the Dentist in executing his duties to the patients in keeping good record of the clients, examining them before any dental procedures etc. He maintained a professional relationship with staffs and is very punctual at work.

He is an asset to the clinic and I do recommend him highly. If you need further information about him feel free to call the above numbers or email me on modoulkeita@gmail.com.

Your Faithfully,

Dr. Modou Lamin Keita
Senior Medical Officer
Chinese Mango Clinic
