RECOMMENDATION LETTER

This is to attest that Mrs. Nyima Mendy is a staff of the Hospital since 2008. She was appointed as a Junior Records Clerk but because of her interest in the field of nursing, she took it upon herself to pursue a nursing training program at the State Enroll Nursing School (SEN) School. Upon completion, she returned back to the Hospital in the year 2018 to serve.

During the period I have not known anything adverse of her. She proves to be capable, efficient, hardworking and assertive in her duties and responsibilities as a Professional Nurse.

Mrs. Mendy has a good record of punctuality, regularity, respect and hard work. Above all, she works amicably with her supervisors, peers, and subordinates alike. She has high regards for authorities and demonstrates professionalism in whatever she says and does. She has sterling qualities of a professional nurse exemplified by the way and manner she discharges her functions as a Trained Nurse.

Mrs. Mendy is one of the most outstanding Nurses who has great passion for the profession and makes the interest of her patients and clients a top priority in her daily activities. She yearns to deliver quality service at all cost. She is well known for her indulgence and sacrifice to satisfy the needs of the patients she cares for.

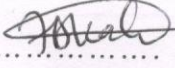

Mrs. Mendy happens to be a teacher and a learner who shares her knowledge with her subordinates and patients whenever she has the opportunity to do so. Her quest for knowledge makes her a frequent user of the hospital library and a regular attendant of the continuous education programs organized by the Hospital Management. Her talents earn her the respect and confidence of the management, staff, patients and escorts alike.

I have no doubt that if given the opportunity Mrs. Mendy will measure up to expectation in any field of studies she wants to Pursue.

I therefore would not hesitate to recommend her for any further education she wants to pursue.

Thank you

Yours Sincerely

.....

Sister Fatou Kah

Ag. Principal Nursing Officer

Bwiam General Hospital
