Admission of Differently-abled Applicants into Teacher education programme

During our last academic board meeting, among the discussion points that the meeting agreed on; was the consideration of differently abled persons for admission into our programme. It was agreed that they will be given consideration for admission even where they do not meet the entry requirement.

This is to support and encourage them and also after graduation to serve as role models in society.

For the 2023/2024 student recruitment, the following differently abled applicants have submitted their application.
