

SANYANG MAJOR HEALTH CENTER

Sanyang Village
Western Health Region II
The Gambia

Date: 3rd December, 2021.

Re: TO WHOM IT MAY CONCERN

I have the privilege of working with Fatoumata Barry in her capacity as a volunteer at Sanyang Major Health Center from January 13th 2021 to date. Over the period, she has proven to be reliable, dependable and have shown great sense of responsibility.

She is quiet suitable for any assignment under any institution as demonstrated by her willingness to search for knowledge and experience as a volunteer at various departments of Sanyang Major Health Center in the service of humanity. She always demonstrates high degree of maturity and manifests high disciplinary qualities.

She has comfortably worked with all the staff as well as having good rapport with community inhabitant in the care of needy. Her ambition is to become a trained Nurse; and this particular area of studies has a limited human resource capacity in the length and breadth of this country, hence the need to encourage the young talented and enthusiastic Gambians to venture into this noble field of study.

She is amicable, willing, diligent and dedicated, who enjoyed good rapport with people.

I am confident she will prove herself to the best of her ability in any challenging situation that comes her way. I wish her every success in all her future endeavors.

Yours sincerely,

Mr. Omar Baldeh

Officer-In-Charge
